Compliance, Risk & Safety Platform

Turn risk reduction into a work-winning strategy with HammerTech — the Compliance, Risk and Safety platform for construction that improves productivity and profit.

Executives, safety leaders, and site supervisors gain 360-degree visibility into all jobsite and subcontractor activity whether onsite or remote to reduce delays and improve progress tracking.

Increase accountability and compliance with automated pre-start tracking of JHAs, safety plans and SDSs. Increase engagement with pre-task plans, inspections, permits and much more. Keep site teams safer, improve subcontractor performance and lower insurance premiums.

Results in:

Increase productivity with simplified trade partner and worker onboarding. Review and collaborate with your trade partners on EHS documentation from anywhere at any time. Reduce overtime spent preparing reports with accessible live data, exportable reports and business intelligence boards.

Reduce incident risk with a certified workforce. Pre-qualify, spot coaching opportunities and select better subcontractors with detailed historic compliance, risk and safety data. Prevent lapsed training and certificates of insurance with automated expiry tracking.

Safer teams, lower insurance costs. Empower your trades to control hazards and reduce injuries with connected pre-task plans, JHAs and permits. Prove commitment to compliance and lower risk with total visibility of all job site activity and detailed digital records.

Total Compliance, Risk and Safety on a single platform

With one platform, everything compliance safety and risk is in one place. Reduce friction caused by app switching and increase trade partner engagement with CRS processes. Integrate and streamline data sharing across your organization, trades and tech stack to reduce duplication and improve productivity. Increase the value of your processes with a platform that configures to your CRS system. With professional structured training, your teams are supported and receive the keys to continuously improve your CRS approach.
