

# Site and Office Integration

**The Gold Standard Software for Safe and Efficient Sites** 

The Procore and HammerTech integration offers gold-standard visibility and productivity across construction management, safety and site operations. Connect every worker and subcontractor to all HSE workflows in one place to unite project and office teams. The integration offers safety leaders, supervisors and project managers better visibility with digital SWMS, pre-start meetings, observations, logistics, permits and much more in one software platform.

Job Ready, Compliant Trades

Subcontractors are job ready earlier with improved pre-start communication and a free portal to submit pre-start documents, qualifications and training records.

Avoid start-up delays

Save time with online inductions. On average, one in two workers completes orientations before arriving on-site and site teams save one hour per day.

## Increase jobsite and labor hour visibility

Crowdsource daily report efforts from subcontractors with live labour hours including sign-in/ out times. View daily activity to keep jobs on track with detailed drill-down in one place for inspections, observations, pre-start readiness KPI's, bookings and much more.

Save time with more efficient site processes

Subcontractors are connected to all HSE and site operations processes digitally so you can review and provide feedback remotely on permits, inspections and SWMS up to 57% faster. Focus on coaching efforts to improve safety compliance and send people home safely. 57%

faster HSE approvals

## NAMMERTECH

## Integration at a Glance

#### Labour Hours

Hours by subcontractor with worker numbers automatically sync to the Procore Daily Log. Subcontractors have mobile access to submit hours by worker. Prevent double entry, quickly review and approve hours on mobile for increased confidence in recorded hours.

Subcontractors (Vendors) created in Procore automatically show in HammerTech. With bi-directional options, subcontractors assigned to projects sync in Procore or HammerTech to improve the visibility of subcontractor performance between the jobsite and office.

#### **Project Information**

Projects created in Procore are automatically created in HammerTech to improve governance and performance tracking. Includes start/end dates, project value, address and more.
